- Points are per title in that row if labeled /t. Otherwise, multiple titles in the row do not earn more bonus points. For example, a dog with a DOCK Novice and Dock Junior would earn just a single 0.5 point.
- Bonus Points are added to the total and are not part of any individual category score.
- When a dog with a Bonus Point title earns a pointed title that blocks that Bonus points, the dog at the same time earns the higher point value of the pointed title. For example, a dog with a RATI would have 0.25 Bonus Points who then earns a RATN, the dog will have the 2-point value of the RATN and would no longer have that 0.5 Bonus Points.
- If (when) in the future we promoted some of these Bonus titles to regular titles in the point-chart, they would certainly be worth more than keeping them as Bonus points. The idea is to give them some recognition and value, not to precisely represent their value.
